

The World's Best Swim Lessons!
No Other Sport or Lesson Can Help Save YOUR Child's Life

AQUA BABIES

Only offered at the Cavanagh Pool Where the water is 87 degrees!

Children 6 months to 3 years of age

Parents must accompany child in water

Infants 6 months to 3 years are accepted into the program with their parents with the purpose of promoting a positive response to the water environment to teach the child to float on their back and to get a breath of air. We do not teach infants to "swim." Though some other skills are learned, this part of the program is not described as a "Learn to swim" because that implies a skill level that we do not intend to attempt at this age range. Aqua Babies will encourage new abilities in the areas of motor development, language, emotional and social skills. Because the parent is in the water with their child, there will be an enrichment of parent-child relationship. This class is taught by of certified SwimAmerica Swim Coach who has been specifically trained for this age group.
